

ABSTRACT OF THE DISCLOSURE

A personal care garment having side seams with a discreet or aesthetically pleasing appearance. The side seams can extend from a waist opening to each of two leg openings between a front side panel and a back side panel. In one embodiment, a ribbon cover is attached to an outer surface of the garment to secure the side seam and provide a finished, aesthetically pleasing appearance. In another embodiment, an embossing pattern can be applied to the side seam to provide a finished, aesthetically pleasing appearance.
